

Distance to Closest Statistics Canada Urban Area From Ontario Municipalities

Spatial data processing: Adam Bonnycastle, MSc, 2008.

Contracted by: Dr. Brady Deaton, Food Agricultural and Resource Economics, University of Guelph

Produced using information provided by, or under license with: DMTI Spatial Inc., 2005; Statistics Canada, 2006, 2001, 1996.

Methodology:

All distances calculated by road, using 2005 DMTI vector road data.

Vector road data converted to 20 m x 20 m raster cells.

Cost-distance function performed to calculate distance from each road cell to boundary of closest Statistics Canada Urban Area.

2005 DMTI municipal boundary vector data overlaid with cost-distance raster.

Mean distance from each municipality to closest urban area calculated.

Calculation performed for 1996, 2001, 2006 census years.

Differences calculated between three sets of results.

Negative differences represent urbanization in, or near to, a municipality; positive differences represent loss of urban area.
